ABC College Website – Explanation

Introduction

The ABC College website is a multi-page website designed to give students and visitors important information about the college. It uses a common navigation bar, a dark-blue header, light backgrounds, cards, tables, and buttons to make information easy to find. The screenshots show four main pages: Home, Departments, Courses, and Admissions.

1. Home Page

The home page is the first page visitors see. The top navigation bar contains links such as Home, About, Departments, Courses, Faculty, Admissions, Events, and Contact. The large banner displays “Welcome to ABC College” with the slogan “Learn Today, Lead Tomorrow.” The “Explore College” and “Apply Now” buttons guide visitors to important sections. Below the banner, the “Explore Our College” section introduces college information through image cards. One image appears to be broken in the screenshot, so its image path should be checked.

Main purpose: Welcome visitors and provide quick access to college information and admission options.

2. Departments Page

The departments page has a heading, “Our Departments,” and a short description asking students to choose an area of interest. Four cards are visible: Computer Science, Electronics Engineering, Mechanical Engineering, and Basic Sciences. Each card contains an image, department name, a short description, and a “View Courses” button. This card layout helps students compare departments quickly.

Main purpose: Explain the academic departments and help students explore their subjects.

3. Courses Page

The courses page begins with “Courses Offered” and a sentence about academic programs and their duration. A table under “Undergraduate Programs” lists the serial number, course name, duration, and an action link. The visible examples are B.Tech Computer Science, B.Tech Artificial Intelligence and ML, B.Tech Electronics Engineering, and B.Tech Mechanical Engineering. Each program is shown as four years, and the “Apply” link provides a way to proceed toward an application.

Main purpose: Present course information in a clear, structured table.

4. Admissions Page

The admissions page displays “Admissions 2026–27” and the message “Take the first step towards your future.” The “Admission Procedure” section gives six steps: choose a preferred course, check eligibility, complete the application form, submit required documents, follow the selection and counselling process, and pay fees after admission is confirmed.

Main purpose: Explain the admission process so that applicants know what to do next.

Design and HTML/CSS Features

Feature	Explanation
Navigation bar	Provides links between the website pages.
Colours	Dark blue and light blue create a consistent college theme; yellow buttons stand out.
Hero/banner section	Uses a large background image and a prominent welcome heading.
Cards	Group department or college information into separate, easy-to-read blocks.
Table	Organizes course names, durations, and application links into rows and columns.
Buttons and links	Help users explore sections or start the application process.
Consistent layout	Repeating the header, colours, and spacing makes the pages feel connected.

Suggested Improvements

• Fix the broken image on the home page by checking the image filename and relative file path.

• Make sure each navigation link opens the correct HTML page.

• Add responsive CSS so the navigation bar, cards, and table fit mobile screens.

• Connect the “Apply” and “Apply Now” links to a working admission form.

• Add meaningful alternative text to images for accessibility.

Conclusion

The ABC College website presents college information through four useful pages. The home page welcomes visitors, the departments page introduces academic areas, the courses page lists programs and durations, and the admissions page explains the application steps. Its consistent navigation, colours, cards, and table make the site easy to understand. Checking image paths and ensuring all links work will improve the website further.
